

Austin and the EPA's PM_{2.5} NAAQS

Dave Sullivan, Ph.D.

Email bc-David.Sullivan@austintexas.gov; Cell 512-914-4710

City of Austin Environmental Commission

June 7, 2023

Background

- U.S. Environmental Protection Agency (EPA) regulates America's environmental quality based on authorization from the Congress & President.
- One tool for judging and regulating air quality are the National Ambient Air Quality Standards (NAAQS), which are applied to:
 - Ozone
 - Nitrogen dioxide
 - Sulfur dioxide
 - Carbon monoxide
 - Lead
 - Particulate matter

Particulate Matter 101

- Particulate Matter (PM)
 - Total suspended particles (TSP) includes all airborne particles and the Lead NAAQS is regulated by measuring TSP and isolating the Lead component.
 - PM10 is particulate matter less than 10 microns in diameter and is inhalable. Sources include dust, mold, pollen.
 - PM2.5 is particulate matter less than 2.5 microns in diameter and penetrates into the lung. Sources include smoke, sulfate, fine crustal material, vehicle exhaust.
 - PM can be measured on a filter after air has passed through it for 24 hours. This is the Federal Reference Method. Sample analyzed later in a lab. Samples generally taken every 6th day.
 - PM can also be measured by measuring the energy absorbed from beta particles (electrons) as they pass through particulate matter (PM) collected on a filter media. This produces continuous hourly data.

https://www.epa.gov/pm-pollution/particulate-matter-pm-basics

- TCEQ had 16 Regions
- Air Quality is judged based on MSA/CMSAs
- For Austin, our MSA is Travis, Hays, Williamson, Burnet, and Caldwell Counties

EPA PM NAAQS

		primary	1 year	12.0 μg/m³	annual mean, averaged over 3 years			
	PM _{2.5}	secondary	1 year	15.0 μg/m³	annual mean, averaged over 3 years			
Particle Pollution (PM)		primary and secondary	24 hours	35 μg/m ³	98th percentile, averaged over 3 years			
	PM ₁₀	primary and secondary	24 hours	150 μg/m³	Not to be exceeded more than once per year on average over 3 years			

Air monitoring station (CAMS 1068)

Current PM_{2.5} status in Texas

- Downloaded raw data & data summaries.
- Crunched the data.
- NAAQS determination generally required three year of complete data.
- Excluded stations with less than complete data.
- Results follow....

EPA Proposal to Strengthen PM_{2.5} NAAQS

- Earlier this year, EPA announced its proposed decision to revise the primary (health-based) annual PM_{2.5} standard from its current level of 12.0 μg/m³ to within the range of 9.0 to 10.0 μg/m³.
- See: https://www.epa.gov/pm-pollution/national-ambient-air-quality-standards-naaqs-pm

Federal law (CAA sec 179B) allows removal of some data from NAAQS calculations

- An air agency has the authority under section 179B to develop and submit to EPA a demonstration that its SIP would be adequate to ... maintain the NAAQS ..., but for emissions emanating from outside the U.S. (https://www.epa.gov/sites/default/files/2020-12/documents/final_caa_179b_guidance_december_2020_with_disc_laimer_ogc.pdf)
- In Many cases, smoke from agricultural fires in Central America and Southern Mexico and airborne dust from North African deserts impact the Texas coast and inland areas.

Application of CAA 179B

 June 26 & 27, 2020 TCEQ Forecast: Heavy amounts of African dust will arrive along the coast & begin moving inland over the course of the day ... daily PM2.5 AQI is forecast to reach the middle to upper end of the "Unhealthy for Sensitive Groups" range in parts of the Brownsville-McAllen area; the lower to middle end of the "Unhealthy for Sensitive Groups" range in parts of the Beaumont-Port Arthur, Corpus Christi, Houston, Laredo, & Victoria areas.

June 26-27, 2020 African Dust Case in Austin

TCEQ will likely adjust the annual means to remove African dust cases and other "outside the US" origin $PM_{2.5}$

- Have not looked at the effect of removing "out of US" days on the annual means.
- Happy to answer questions...

The End
